

EHRS UPDATE

2011 NASA Occupational Health
OM Breakout
12 July

EHRS

- What It Is
- What It Isn't
- Deployment Schedule
- Pre-deployment Planning

Medgate Gx—What It Is

- Electronic Medical Record*
- Created to support Occupational Health surveillance
- Supports compliance with OSHA and NASA occupational requirements
- Allows users to establish recalls (expiration dates) for certifications, surveillance exams, labs, etc
- Document protocol specific lab results

**NAHIT: Health related information created, gathered, managed...from a single organization...*

Medgate GX—What It Isn't

- Electronic Health Record*
- Does not communicate with other EMRs
- Acute/chronic care management system
 - No Clinical Decision Support
- Billing support system
- A replacement for all current reporting or documentation systems

**NAHIT: The aggregate electronic record of health-related information ...created and gathered cumulatively across more than one health care organization...*

Phased Training

- Medgate 101
 - Focus of roll out to Centers
 - Basic knowledge and understanding
 - Ensure correct data entry/documentation
- Medgate 201
 - Develop custom questionnaires, templates, etc
- Medgate 301
 - TBD

Implementation team is also learning Medgate

Center Pre-deployment Planning

- Build center specific protocols
- Understand and define workflows
 - Exam process (multiple parts?)
 - Routine reporting requirements
 - Business processes (billing, etc)
- Develop equipment requirements
 - Computers, scanners, etc
- Make plans for legacy data
